(ii) The following table shows the daily supply of electricity to different places in a town. To show the information by a pie diagram, measures of central angles of sectors are to be decided. Complete the following activity to find the measures:

Places	Supply of electricity (Thousand units)	Measure of central angle
Roads	4	$\frac{4}{30}\times360=48^{\circ}$
Factories	12	= × 360 = 144°
Shops	6	$\frac{6}{30} \times 360 = \square$
Houses	8	□ × 360 = □
Total ⇒	30	

- (iii) Two coins are tossed simultaneously. Complete the following activity of writing the sample space (S) and expected outcomes of the events:
 - (i) Event A: to get at least one head.
 - (ii) Event B: to get no head

Acitivity: if two coins are tossed simultaneously

$$: S = \{ \square, HT, TH, \square \}$$

(i) Event A: at least getting one head.
